Index of Authors

Entries marked * refer to abstracts or titles of papers listed in Proceedings at meetings of the Society for Applied Bacteriology. Small roman numerals refer to pages in Proceedings at meetings of the Society for Applied Bacteriology.

Entries marked † refer to the titles of Symposium papers published in a separate volume.

*ABDELGADIR, A. M. *see* SAAD, A. M.

ACKERMAN, J. C. *see* THOMAS, D. S.

ADEGOKE, G. O. & BABALOLA, A. K. Characteristics of micro-organisms of importance in the fermentation of fufu and ogi – two Nigerian foods 449

ADERIBIGBE, E. Y. & ODUNFA, S. A. Purification and characterization of extracellular proteinases excreted by a strain of *Bacillus subtilis* BS2, isolated from fermented African locust bean 'iru' 361

AL-AZAWI, S. K. *see* AL-GHAZALI, M. R.

AL-GHAZALI, M. R. & AL-AZAWI, S. K. Effect of sewage treatment on the removal of *Listeria monocytogenes* 203

AL-GHAZALI, M. R. & AL-AZAWI, S. K. Storage effects of sewage sludge cake on the survival of *Listeria monocytogenes* 209

Index of Subjects

Entries marked * refer to abstracts or titles of papers listed in Proceedings at Meetings of the Society for Applied Bacteriology. Small roman numerals refer to pages in Proceedings at Meetings of the Society for Applied Bacteriology.

Entries marked † refer to titles of Symposium papers published in a separate volume.

Aerosol survival of legionellae (Dennis & Lee) 135
Aeromonas distribution (Pathak, Bhattacherjee, Kalra & Chandra) 347
Aflatoxins (Saad, Abdelgadir & Moss) xviii
*Agricultural sludge and parasites (Pike & Carrington) viii
*Agricultural fungicides (Badii & Moss) xviii
*Animal cell culture (Narendranathan) ix
*Antibiotic-associated diarrhoea (Surawicz, Elmer, Speelman, McFarland, Chinn & van Belle) xii
Antibiotic-producing marine bacteria (Dopazo, Lemos, Lodeiros, Bolinches, Barja & Toranzo) 97
*Antibiotics and *Clostridium difficile* (Lovett) xiii
*Antimicrobial agents (Roller & Barker) vi
Assessment of surface hygiene (Holah, Betts & Thorpe) 215
Bacillus thuringiensis insecticide (Pearson & Ward) 195
Bacteria antagonistic to *Pseudomonas tolaasii* (Fermor & Lynch) 179
*Bacteria in beef slurry (Kearney & Levett) xx
*Bacterial growth in animal feed (Hinton, Bale & Cherrington) xvi
Bacterial toxins (Rose, Modi, Tranter, Bailey, Stringer & Hambleton) 223
Bacteriophage as tracers (Wheeler, Skilton & Carroll) 377
Bacteriophage in ground water studies (Skilton & Wheeler) 387
*Behaviour of *Salmonella enteritidis* (Garcia & Perales) xix
*Bioassays for mycotoxins (Saunders) x
*Biogenic amine formation (Joosten) xxix
*Bread spoilage (McGrath, Odell & Davenport) xviii
Brewery fermentation (Hammond) 169
Campylobacter and salmonella in milk (Humphrey & Hart) 463
*Campylobacters in food (Fricker & Park) xii
Campylobacter jejuni (Beumer, Cruysen & Birtantie) 93
**Campylobacter jejuni* (Illingworth, Blease & Fricker) xvii
**Campylobacter pylori* growth (Illingworth, Park & Fricker) xviii
Carbon utilization (Tracey & van Rooyen) 113
*Cell metabolism (Cherrington, Hinton & Chopra) xvi
Charged filters (Thomas) 35
*Chlorine-releasing antimicrobials (Arthur & Bloomfield) xiii
*Clavulanic acid (Sladen & Scott) xvi
*Collaboration and competition (Delaney, Park & Baker) xxi
Computer data file (Brown) 49
Competition for hydrogen (Gibson, Cummings & Macfarlane) 241
Comparison of bacillus spores (Foegeding & Fulp) 249
*Competitive growth (Martins & Harrigan) xxvi
Cross protection (Yoshida, Ichiman & Umeda) 491
*Cryptosporidium (Casemore) viii
**Cryptosporidium* sp. oocysts (Smith, McDiarmid, Gilmour & Smith) xxx
Degradation of benzenes (Goulding, Gillen & Bolton) 1
*Dehydration (Kirby & Davies) xix
Detection of H_2O_2 (Juven, Weisslowicz & Harel) 357
Detection of enterococci (Neaves, Waddell & Prentice) 437
*Detection of *Vibrio parahaemolyticus* (Oscroft) xxiv
*Discrimination of Gram-negative bacteria (Illingworth, Blease & Fricker) xvii
*Discoloration of rice (Phillips, Twiddy & Reilly) xxix
Disinfectants and *Staphylococcus aureus* (Al-Masaudi, Day & Russell) 329
Energetics of *Clostridium sporogenes* (Dixon, Lovitt, Morris & Kell) 119
Enzyme production by *Thermomonospora curvata* (Bernier, Kopp, Trakas & Stutzenberger) 411
Ethanol tolerance of wine yeasts (Gao & Fleet) 405
*Faecal flora (Bezirtzoeglou & Romond) xvii

*Faecal pollution of seawater (DRAIN & LEVETT) xx
Fermentation of fufu and ogi (ADEGOKE & BABALOLA) 449
†Filamentous fungi in food (LACEY) ii
*Fluorogenic dye incorporation (SMITH, SMITH, GILMOUR & CARRINGTON) xxx
†Food mycology (PITT) i
†Food spoilage by fungi (LACEY) i
*Food systems (EARNSHAW & BANKS) vii
*Food preservation (DEMPSTER & MCGUIRE) xxv
Foot odour (MARSHALL, HOLLAND & GRIBBON) 61
*Free chlorine and *Cryptosporidium* spp. oocysts (SMITH, SMITH & CARRINGTON) xxx
†Fungi and food production (CAMPBELL-PLATT & COOK) v
†Fusarium (BRAYFORD) ii
†Fusarium toxins (GILBERT) iv
*Gamma irradiation (GRANT & PATTERSON) xxvi
*Genetics (GASSON) vii
**Giardia* sp. cyst detection (GILMOUR, SMITH, GIRDWOOD, SMITH & MORRIS) xxx
*GLC and MSD and mycotoxin analysis (HOWELL & HAZEL) xi
Gram-negative bacteria (SHAW & LATTY) 7
Growth of *Streptococcus salivarius* (HARTY & HANDLEY) 143
*Identification of mycobacteria (COLLINS & LOVETT) xx
Inhibition of sulphate reducers (NEWPORT & NEDWELL) 419
Intestinal sulphate-reducing bacteria (GIBSON, MACFARLANE & CUMMINGS) 103
*Irradiation (HUGHES & PATTERSON) xxv
*Isolation of *Yersinia* sp. (WALLS & LEVETT) xxi
*Lactic acid bacteria (TEN BRINK, GOL & HUIS IN'T VELD) vi
Legionella identification (VESEY, DENNIS, LEE & WEST) 339
Legionella spiritensis (HARRISON, SAUNDERS, DOSHI, WAIT & TAYLOR)
*Magnetotacic cocci (SPARKS, LLOYD & BOARD) xxiii
†Methods in food mycology (WILLIAMS) iii
Microflora of barley malt (PETTERS, FLANNIGAN & AUSTIN) 279
*Microbial flora (DONAGHY, LEVETT & HAYLOCK) xx
Minimum growth temperatures (JUNTTILA, NIEMELA & HIRN) 321
*Mode of action (LÜCKE) vii
*Monoclonal antibodies to aflatoxin (CANDLISH, SMITH & STIMSON) ix
Muscle surface colonization (MATTILA & FROST) 455
†Mycotoxins (MOSS) iv
†Mycotoxin analysis (JEWERS, COKER, JONES, CORNELIUS, NAGLER, BRADBURN, TOMLINS, MEDLOCK, DELL, BLUNDEN, SHARKEY & ROCH) v
*Mycotoxin analysis (MORGAN) x
†Mycotoxins in disease (KROGH) iv
*Mycoflora of gari (SANNI) xxv
**Neosartorya fischeri* (NIELSEN, BEUCHAT & FRISVAD) xviii
*Nisaplin (DELVES-BROUGHTON) xi
Nocardia identification (COLLINS, YATES & UTTLEY) 55
*Nutrient-limited growth (DENYER & FYFE) xxi
*Oxygen supply (KIRKBY) ix
pAMβ1 transfer (MORELLI, SARRA & BOTTAZZI) 371
*Parasites (CREWE) vii
Pasteurized milk (GRIFFITHS & PHILLIPS) 269
*Patulin (DAMOGLOU & PATTERSON) xvi
Pectin lyases (PARINI, FORTINA & MANACHINI) 477
Pediococcus acidilactici bacteriocin (BHUNIA, JOHNSON & RAY) 261
**Pediococcus pentosaceus* growth (MARTINS & HARRIGAN) xvii
†Penicillium toxins (MANTLE) iv
*Physiology of SRB (GIBSON, CUMMINGS & MACFARLANE) xxii
Plasmid pIP501 (THOMPSON & COLLINS) 309
*Plasmids in *Aeromonas* sp. (SLADEN, CONNERTON & FRICKER) xiv
*Plasmid profiling for *Bacillus cereus* (ELLISON, DODD & WAITES) xiv
*Plasmid profiling for *Brochothrix thermosphacta* (DODD & WAITES) xv
*Plasmid profiling for *Clostridium perfringens* (LONGDEN & PHILLIPS-JONES) xv
Polygalacturonase biosynthesis (SAKELLARIS, NIKOLAROPOULOS & EVANGELOPOULOS) 397
Potassium sorbate treatment (STATHAM & MCMEEKIN) 469
Protein patterns *Campylobacter laridis* (OWEN, COSTAS, SLOSS & BOLTON) 69
Proteinases of *Bacillus subtilis* (ADERIBIGBE & ODUNFA) 361
*Protease formation (ALLISON & MCFARLANE) xxi
*Publishing papers (COLLINS) xvii
Recovery of *Staphylococcus aureus* (BORREGO, FLORIDO, MARTINEZ-MANZANARES & ROMERO) 153
Refuse fermentation (KASALI, SENIOR & WATSON-CRAIK) 231
Rhizobium meliloti (BOIARDI, MORENI & GALAR) 189
*Risk in the laboratory (COLLINS) xiii

Rumen lactobacilli (MAROUNEK, JEHLICKOVA & KMET) 43
*Salmonella detection (FUCHS & STEPHENS) xxviii
*Salmonella detection in confectionery (FRODSHAM & BULLOCK) xii
*Salmonellae inhibition (LÜCKE, SCHMIDT & SCHILLINGER) xxix
Sewage sludge cake (AL-GHAZALI & AL-AZAWI) 209
Sewage treatment (AL-GHAZALI & AL-AZAWI) 203
*Sorbic acid (HATTON & KINDERLERER) xxiv
Soya–daddawa fermentation (OGBADU & OKAGBUE) 353
**Staphylococcus aureus* (SAAD, AL-MASAUDI, DAY & RUSSELL) xiii
Staphylococcus aureus (NUNEZ, BAUTISTA, MEDINA & GAYA) 29
*Staphylococcal adhesion (KHAN, DENYER, DAVIES & DAVIS) xvii
Streptococcal adhesion (HOGG & MANNING) 483
**Streptococcus lactis* inoculation during cheese ripening (DEL POZO, GAYA, MEDINA & NUNEZ) xi
*Succession of yeasts (TUDOR & BOARD) xxiii
*Sulphite tolerance (DILLON & BOARD) xxiii
†Systematics of *Aspergillus* and *Penicillium* (PITT & KLICH) ii
*Taxonomy of *Aeromonas* sp. (SLADEN, MOFFAT, CONNERTON & FRICKER) xiv
*T cells (REES) ix
*Therapeutic proteins (HARRIS) ix
*Three-stage continuous culture system (MACFARLANE, HAY & GIBSON) xxii
*Tissue culture and mycotoxins (ROBB & NORVAL) x
*TLC and HPLC and mycotoxin analysis (WEATHERBY, SCUDAMORE & HETMANSKI) x
*Transmission of giardiasis (JAKUBOWSKI) viii
*Ultrastructure of *Penicillium cyclopium* (HATTON, HANSBRO & KINDERLERER) xxiv
*Utilization of amino acids by SRB (GIBSON, PARKES & HERBERT) xxiii
*Utilization of peptides (GIBSON & MACFARLANE) xxvi
*Viablue (HUTCHESON, MCKAY, FARR & SEDDON) xix
†Volatile metabolites (KINDERLERER) v
*Volatile phenols (ALLISON & MACFARLANE) xvii
Water hygiene (TOSTI & VOLTERRA) 87
*Water activity dependence of starter cultures (NICOLAIDES, COOKE & WAITES) xxix
Water treatment (COLBOURNE, TREW & DENNIS) 79
Wheat bran as supplement (SHAMALA & SREEKANTIAH) 433
Wine-spoiling yeasts (THOMAS & ACKERMAN) 299
*Yeast detection using conductimetric method (CONNOLLY, LEWIS & CORRY) xii
*Yeast extract brands (RASMUSSEN, FILTENBORG & FRISVAD) xv
Yeasts in wine fermentation (HEARD & FLEET) 23
